

## THE PHILIPPINES ECONOMY

The physical environment of the Philippines, such as the relaxing beaches and the nice shops has affected the economy tremendously. First, the Philippines were one of the richest countries in Asia. But now their economy has slowed down due to the Philippines government. Secondly, today's economy in the Philippines has done better due to their government. Because the government controlled the fiscal deficit. As you can see the economy tremendously affects the physical environment of the Philippines.

# CULTURAL DIFFUSION IN THE PHILIPPINES

The physical environment of the philippines, such as the tropical land has affected cultural diffusion. First the pacific ocean and the tropical lands affected the spanish to arrive by the religion which was roma catholic. They have had that religion around for 300 year or more. Their religion originated from Mindanauo, Inglesia, and America. The tropicalness attracted the spanish. Secondly, the language was and or is from America. The language they speak is called taglish, (english, and filipino together). The english came from America. That is an example of cultural diffusion. As you can see the physical environment affects cultural diffusion of the philippines.

## TRADE PATTERNS

The physical environment of the philippines , such as the pacific ocean has affected the trade patterns. First, if there wasn't the ocean then the philippines would not be able to trade to other countries. Secondly, the spanish could not have arrived to the philippines and shared their religion. As you can see the physical environment of the philippines has affected trade patterns.
